DURA-GRO[®]

PLASTIC CHICK FEEDER

SOUTHWEST AGRI-PLASTICS is proud to introduce our newest addition to our poultry product-line the **DURA-GRO Plastic Chick Feeder**. This is the best chick feeder for transitioning the chicks to an automated pan. The design allows for larger space between pans and provides for 20% larger perimeter than the circular models. Each feeder will accommodate up to 100 birds. Recommended for chicks from day 1 though day 12 when birds reach the size that allows feeding from the automated pans. Dura-Gro chick feeder reduces feed waste and contamination because the design prevents the chicks from entering the feeder. Test results for hopper style feeders show up to 14% higher final live weight. We manufacture the feeder from a virgin high-density polyethylene plastic, providing superior impact and wear resistance. Coming soon will be our storage system that will make the Dura-Gro chick feeder the easiest to store and maintain versus other chick feeders on the market.

FEATURES & BENEFITS

- **Helps Keep Feed Clean & Dry to Reduce Risk of Diseases**
- **Better Feed to Gain Ratio**
- **Durability: Virgin High Density Polyethylene With Superior Impact/Wear Resistance**
- **Reduces Cleaning Time**
- **Better Feed Distribution**
- **Fits Easily Between All Brands of Feeding Equipment**
- **Less Contamination**
- **Reduced Feed Waste**
- **Increased Live Weight in the First Week of Age and at the End of the Flock Cycle**
- **Improves Uniformity**

SPECIFICATIONS

- **Size:** Width 6.75" x Length 15.25" x Height 8"
(W 17.15 cm x L 38.74 cm x H 20.32 cm)
- **Feed Capacity:** 11 lbs. (4.99kg)
- **Weight:** 1.05 lbs. (.48kg)
- **Recommended Density:** Up to 100 chicks.

DURA-GRO Feed Dispensers

DURA-GRO Filler is a plastic feed dispenser with a guillotine system to control the feed flow at the level of the tube. It can be installed with all brands of automatic feeders (Big Dutchman, Chore-Time, Cumberland, Roxell, Val-Co, etc.). The hole should be approximately 7/8" to 1" diameter. **DURA-GRO Sleeve** is a plastic feed dispenser designed to control the feed flow at the level of the tube. It can be installed on any brand of metal tube. The hole should be approximately 7/8" to 1" diameter.

DURA-GRO Storage System

The **DURA-GRO Storage System** will eliminate the need to remove the feeders from the house. The Stand slides into the Sleeve and the Sleeve snaps on the feed tube. Stack the feeder on the Stand and you're done. Works with most hopper style feeders.
