## **NEW DURA-BENCH ULTRA** **Plastic Bench Top for Greenhouses Benches**

Southwest Agri-Plastics introduces the new ***DURA-BENCH ULTRA*** plastic bench top for greenhouse tabletops. The DURA-BENCH ULTRA is designed with larger openings for more air circulation; end tabs for quicker installation, and patented recessed plastic rails for easier attachment to your bench substructure.

The unique design allows the part to replace expanded metal in stationary and roll-top benches. No longer do you have to fight rusted, wavy and sharp expanded metal bench tops.

The DURA-BENCH ULTRA is durable, smooth, non-porous, and allows trays, flats, and pots to slide across the surface without snagging. The DURA-BENCH will not rot, crack, or splinter like wood products; and it will not corrode, rust or have sharp edges like expanded metal or wire tops.

The DURA-BENCH ULTRA panels weigh 4.5 lbs each and the nominal size is 24" x 48". The end tabs allow one part to be connected to the end of the next part. In addition, thumb-lock clips are used on the sides for heavy pots.

Call (800) 288-9748 or email us at [info@swapinc.com](mailto:info@swapinc.com) today to order your free sample of the new DURA-BENCH ULTRA bench top.
